DETAILED ACTION

REASONS FOR ALLOWANCE

1. Claims 1, 4-14, & 16-19 are allowable over the prior art.
2. The following is an examiner's statement of reasons for allowance:

With respect to claims 1, 14, & 19, Munks et al 6,289,028 B1 disclose a laser wavelength control apparatus comprising a dither modulator (350), a laser (12), a filter (32), a laser wavelength control unit (24), a detector (40), and an error circuit (48). The laser serves as an optical signal generator, while filter (32) serves as an optical filter element. The dither modulator (350), laser wavelength control unit (24), detector (40), and an error circuit (48) serve as part of the wavelength locked loop servo-control circuit. Munks et al do not disclose nor suggest that the adjustment due to the error signal occur when the frequency characteristic of a feedback error signal is two times of the dither modulation frequency. As a result, independent claims 1, 14, & 19 and dependent claims 5-13 & 16-18 are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Jacobowitz et al 6,597,840 B2 disclose a wavelength locked loop.

Stayt, Jr. et al 6,389,046 B1 disclose a wavelength selection and stabilization device.
